Ensure compliance in Teams with ASC Recording Insights

ABOUT ASC TECHNOLOGIES AG:

ASC is a global software provider of omnichannel recording, quality management, and analytics solutions. The native Microsoft Teams app ASC Recording Insights guarantees legally compliant recording and analysis of all communication channels in Teams.

See what customers are saying:

“ASC Recording Insights allows us to fulfill regulatory requirements for the capture of audio using Teams—and do so natively. The design and integration of the solution is a significant improvement over other tools we have previously used.”

*– Brian Fruh, Chief Information Officer,
Impax Asset Management*

WHAT WE OFFER

ASC Recording Insights provides a legally compliant recording and analytics solution for its customers’ entire communications in Microsoft Teams, including chat, phone calls, and video conferences.

The app has been fully integrated into Teams, and its analysis functions help evaluate recorded data and ensure full compliance with legal regulations through the security of Microsoft Azure Cognitive Services.

We offer high-performance analytics, tenant-specific data encryption, and comprehensive compliance and resiliency options.

Our customers, especially financial institutions and public-safety organizations, benefit from our Microsoft expertise in the form of a turnkey option for compliance-grade recording when they adopt Microsoft Teams.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
