## ASC Awarded Skype for Business Certification from Microsoft for Compliance Recording Solution

**ASC to demonstrate regulatory compliant recording of Unified Communications solution Microsoft Skype for Business at CeBIT in Hannover**

**Hoesbach, March 20, 2017** – ASC's recording and compliance software, EVOIP<sup>neo</sup>, has been successfully certified by Microsoft for its interoperability with Skype for Business. ASC showcases it at the CeBIT conference, March 20-24 2017, in Hannover, Germany, at the Microsoft Skype for Business partner booth, Hall 12, booth E24.

Today's companies must fulfill comprehensive regulatory requirements as mandated by MiFID II, the Dodd Frank Act and PCI-DSS. To ensure legally compliant recording, a communications recording solution must operate in a reliable manner on a 24/7 basis. With the newly certified ASC solution, companies can protect themselves against liability claims and ensure the security of customer transactions.

Marco Mueller, Chief Operating Officer of ASC, said, "We were glad to work with Microsoft to successfully certify EVOIP<sup>neo</sup>. Skype for Business typically replaces traditional communications technology and allows unified handling of phone calls, conference calls, video calls and chat. Therefore, it is very important to enable compliance recording - which is exactly what ASC's <sup>neo</sup> suite does."

EVOIP<sup>neo</sup> ensures recording of all customer communications within Skype for Business including application scenarios such as internal and external conversations, mobile clients, home and remote users, as well as conference calls. To facilitate search and retrieval, the solution tags comprehensive index data to each conversation including participants, date, time and the duration of the call.

Marco Mueller, Chief Operating Officer of ASC, added, "Through a comprehensive range of certifications, we ensure seamless integration of our solutions with a huge variety of infrastructures and fully meet the compliance challenges of regulatory legislation around the world."
