Unlocking **Webex** for Communications in Regulated Markets With **Recording & AI**

Streamline Compliance Recording for **Webex Meetings** and **Webex Calling**

In highly regulated markets such as financial industries, the public sector, and healthcare, compliance recording is mandatory for internal and external communications.

webex by **CISCO**

Leverage ASC solutions to enhance your Webex interactions by integrating compliance recording and AI-driven analytics to meet regulations like GDPR, MiFID II, and Dodd-Frank.

Recording & Analytics for Webex Meetings

✓ **Comprehensive recording**
Including audio, video, and chat conversations

✓ **Safe storage**
Securely store data to meet compliance requirements

✓ **Analytics and reporting**
Valuable insights with powerful search, replay, and analysis tools

Recording & Analytics for Webex Calling

✓ **Cloud-based solution**
Benefit from a Cisco-certified recording solution

✓ **Seamless integration**
Easily configurable within the Cisco Webex Control Hub

✓ **Search and insights**
Understand patterns, call quality, and improve efficiency

www.asctechnologies.com

Certified Partner for
Cisco Solutions

ASC is a certified Cisco Solution Partner, specializing in recording, quality management, and AI-driven analytics, along with a fully integrated VoIP recording system.

ASC records all communication channels including landlines, mobile phones, video calls and screen activity. Additional tools for quality management, speech analytics, eLearning and workforce optimization complete the suite.

More than just Recording
Discover the **Power of AI**

Meet compliance regulations
AI-driven, automated, easy

Data security is paramount!

Geodiversity

Geodiversity allows you to store and analyze data in your Azure region.

Keep full control of your data

You can ensure that your sensitive data is not used for training or enriching OpenAI models.

Be safe

Integrated mechanisms for detecting harmful use not only ensure application security, but also underline the ethical responsibility in dealing with AI.

Responsible AI

Microsoft Azure focuses on improved workflows and ethical customer data handling through encryption and the elimination of data training.

- ✓ AI-driven analytics of all content (voice, chat, screen, video)

- ✓ Automated search for critical keywords, patterns, and phrases

- ✓ Use of predefined ASC templates for rules, patterns, or categories

- ✓ Just ask – Azure **OpenAI** answers

"It simply works. Recording Insight's powerful analytics tools enhanced our team's efficiency – allowing our staff to focus on providing great customer service and giving them more time to tackle other critical tasks."

— Matthew Key,
Systems Administrator Olympus Insurance
