

Cloud Storage for Your Recordings – Compliant, Secure, Accessible from Anywhere

Store your Legacy Recording Data in the Cloud

You are moving from an on-premise PBX to a cloud UC service? Great – but what do you do with all your recording data? Why not store your legacy recordings in the cloud, in a compliant and secure manner, without further investments into on-premise hardware?

ASC's Neo Cloud is the perfect fit for your needs, granting you compliance, security – and 24/7 access to your data.

How it works

- Your recorded data is imported into ASC's Neo Cloud and stored in Microsoft Azure Blob Storage
- There, your data is – for highest availability – replicated six times across two geo-redundant Azure data centers.
- Via the Neo web client, your data is accessible from anywhere
- If required, the Neo Download Client always enables downloading your recordings

Highest compliance and security standards

- Meets the security standards thanks to user rights management, multi-level access control, OAuth2 authentication, and tenant-specific data encryption with advanced encryption standard (AES) 256
- All network level communication is protected by TLS
- Data exclusively processed within the European Economic Area (EEA)
- Microsoft Enterprise Cloud certified according to ISO/IEC 27001 and ISO/IEC 27018; ASC is ISO 9001, 14001 and 27001 certified

Compliance and security for recording data

Recording, encryption, and archiving of calls

Storage and replay as a service

Flexible subscriptions

About ASC

ASC is a worldwide leading provider of software and cloud solutions in the field of omni-channel recording, quality management, and analytics. Among our target groups are all companies that record their communications, especially financial service providers, contact centers, and public safety organizations. We offer solutions for recording as well as AI-based analysis and evaluation of all communications – with full flexibility as a cloud service, on-premise or as a hybrid solution. Headquartered in Germany with subsidiaries in 13 countries and experienced system integration partners in over 60 countries, ASC is the #1 Europe-based player in its industry.
